## 👤 Career Aspiration

My aspiration is to bridge full-stack software development, creative UI/UX design, and artificial intelligence to build applications that are technically robust, intuitive, and deeply engaging. Having developed platforms integrating real-time state synchronization, natural language intent parsing, and hybrid vector search, I am driven to push the boundaries of how users interact with software and interactive game environments.

## 🧠 Technical Skills

### Languages

Java, C Programming, Python, MySQL, HTML5, CSS, JavaScript, AdvancedJava, C#, JSP

### Tools/Environments

VS Code, Android Studio

## 🎓 Education

### Bachelor of Computer Applications,

*Amrita Vishwa Vidyapeetham*

07/2023 – 05/2026 | Brahmasthanam, Kochi

CGPA: 7.57 /10

Relevant coursework: Data Structures, Database Management, Web Technologies, Object-Oriented Programming, Python, C-programming, Android Studio, Java, Advanced Java, Data Mining ,Cyber Security

### Class X (Secondary School),

*Assisi Vidyaniketan Public School*

08/2021 | Perumpilly, Vypin, Ernakulam, Kerala

CGPA: 8.04/ 10

### Class XII (Higher Secondary),

*Assisi Vidyaniketan Public School*

05/2023 | Perumpilly, Vypin, Ernakulam, Kerala

Stream: Computer Science

CGPA : 7.92/ 10

## 🏆 Certifications

### Python for Everybody

CodeChef

### Introduction to Databases

Hackerrank

### HTML5 - The Language

Infosys SpringBoard

## 🤝 Leadership & Extracurriculars

- **Team Lead** | *College Project Presentation*
- Managed a 4-member team, delegating tasks and ensuring on-time project delivery.
- Presented final software architecture and project results to evaluators.

### Event Volunteer | *University Tech Festival*

- Co-organized coding competitions and handled event logistics for participants.
- Provided technical guidance and troubleshooting during contest operations.

### Active Member | *College Coding Club*

- Participated in coding challenges and peer-led technical workshops.
- Mentored members on fundamental programming concepts and team workflows.

**Participant** | *Cybersecurity Workshop*

- Completed training in basic cyber defense strategies and network security.

**Content Creator** | *Gaming & Media*

- Produced live gaming broadcasts and designed custom channel UI graphics.
- Managed community interaction and analyzed viewer engagement metrics.

## Projects

---

### MaxMart

01/2026 – Present

- Built a modern e-commerce application equipped with a custom AI shopping assistant that dynamically parses user intent to manage shopping carts and answer queries.
- Integrated MongoDB Atlas vector embeddings and typo-tolerant search algorithms (Levenshtein distance) to ensure seamless product retrieval.
- Created a seamless, live-updating user interface utilizing dual-focus state management to instantly reflect database changes for both customers and administrators.
- Tech stack: React, JavaScript, Node.js, Express, MongoDB, Socket.io.

### Skill Hive

06/2025 – Present

- Built a web platform dedicated to collaborative skill exchange between users.
- Developed user matching functionality to easily connect learners with appropriate peers.
- Integrated live video sessions to facilitate face-to-face, real-time collaboration.
- Created a feedback system to track progress and maintain the quality of the skill exchange.
- Enhanced peer-to-peer learning by enabling seamless real-time collaboration and knowledge sharing.
- Tech stack: JavaScript, Node.js, MongoDB.
